Schedule GS (continued)**

Power Factor Billing Adjustment – As determined by HMP&L, random power factor tests may be conducted on individual General Service Rate customer's metered services. In the event power factor test results are less than 85 percent (0.85), the customer's total monthly billing cost shall be increased by multiplying the total monthly billing cost for metered energy by the power factor adjustment percent. The power factor adjustment percent shall be calculated as the quotient of 0.85 divided by the actual power factor determined by test. After a power factor adjustment has been applied to a customer's bill during any one month billing period, the power factor adjustment shall continue to be applied to all subsequent monthly billings. If the customer's power factor is less than 85 percent, the customer will have the option of installing sufficient power factor corrective equipment. Should the customer fail to exercise such option promptly, monthly demand measurement may also be a Kva demand meter, in which case 0.85 Kva will be considered the actual Kw. The monthly power factor adjustment shall be terminated when an HMP&L power factor test indicates a power factor equal to or greater than 85 percent (0.85).

Term of Service – Monthly.

Payment – Due on or before each monthly billing due date.

Late Payment Fee – A late payment fee will be imposed on all individual payments actually received by HMP&L after the monthly billing due date. The late payment fee will be equal to an additional five (5) percent of the customer's total monthly billing including taxes and other fees, if applicable.
